

905 PILOTHOUSE by Quicksilver: perfection is the aim

6 avril 2015

Posté dans [Bateaux](#)

Choose Your Boat had the great opportunity to discover the 905 PILOTHOUSE, a very new Quicksilver during a sea trial in South of France last 2 weeks. Even at 40 knots or in strong curves this new boat had a huge stability!

The 905 PILOTHOUSE offers an all round solution to your leisure boating needs. With a capacity of 10 people and a six berth sleeping area, the boat offers both offshore cruising capability with full leisure fishing boat ability.

High performance fishing trip

The 905 PILOTHOUSE is powered by up to 500hp of Mercury power and will take you to your fishing destination in speed and with style. A deep V hull is suitable for a variety of weather and sea conditions. The electronics pack with an included GPS navigation system and VHF communication system will ensure you always know exactly where you are.

With ample seating for passengers and ease of manoeuvrability around

the deck, there is easy access to the high specification galley and cabin, which houses a sink, an LPG stove and

plenty of room for comfortable travel. The berths are situated both fore and aft and a pull out shower and toilet are fully separate offering privacy and lots of natural daylight and ventilation through the opening port lights and a skylight.

The fishing cockpit is designed to answer the prayers of every serious hobby angler and comes with sink, cold water wash, cutting board, knife holder, rod storage and holders and refrigerated drawers. Further fish storage is offered in the cockpit floor. An optional sun shade and optional second helm station give protection from long sunny days, and everything is fully lockable and secure, so you can enjoy evenings on shore and have no worries about security.

Comfort and volume for cloudless sea tours

Storage is also provided for long stays away at sea if required. The dining area, the galley and under berth storage ensures that nothing important has to be left behind and all luxuries can be accommodated.

The Smart Edition, usually instantly available, features all the options most desired and requested from customers and can save an extra

10% as an alternative to ordering separately. With quick delivery times and giving you everything you need for your trip, both the basic and Smart editions will have you up, running and fishing in no time.

The standard version includes everything you would expect from a quality Quicksilver vessel, featuring a swim ladder and platform, windscreen wipers and wash, navigation lights and electric bilge pump.

The cockpit is fully floodlit and is self bailing, there is hydraulic steering and a pressure fresh water system in both the galley and the head. A dual battery system ensures you never run out of power. A fire extinguisher is also included.

Optional extras are available, either separately or as part of the Smart Edition. There is a pack available for all areas of the boat, including a Cabin Comfort Pack, Cockpit Comfort Pack, Cockpit Cruising Pack, and packs for electronics and fishing. The hull colour can be chosen by the customer, a sun awning and exterior helm cover is available as well as equipment to make an offshore stay more comfortable. The 905 PILOTHOUSE features a diesel

heater, shore power, air conditioner, grey water system, water heater, a Skyhook digital anchor with Vesselview and a Simrad Radar.

The 905 PILOTHOUSE offers everything you could possibly need for both short and long trips away, whether a weekend with the family or a fishing jolly with friends. Well appointed, comfortable and affordable.

Should you know more about the 905 PILOTHOUSE by Quicksilver, please send an email to [Choose Your Boat](#).
